

Products made from recycled plastic

PET bottles, electrical appliances or waste from private households: Recycled plastics already had their „first life“ as a product in the past. By using recycled materials, we are actively helping to conserve increasingly scarce sources of raw materials and energy and avoid harmful CO₂ emissions. Credible and independent institutions such as DIN CERTCO or EuCertPlast provide certifications as transparent proof of our statements concerning the use of recycled materials.

Dynamix Recycling

Retractable ballpoint pen available in transparent or opaque plastics with matt surface. *Pen body made of > 90% (opaque) or 73% (transparent) recycled plastic. Equipped with Schneider refill 774 M. Produced climate neutrally.
